Objective

Data Engineer with over 8 years of experience in designing and optimizing large-scale data pipelines across cloud and on-premises platforms. Proficient in SQL, Python, Pandas, Databricks PySpark, AWS Redshift, and ETL frameworks, with a strong focus on big data solutions. Demonstrated success in enhancing data quality, automating workflows, and leading teams to deliver scalable and reliable data solutions. Adaptable to dynamic environments, consistently recognized for high-quality work and efficiency.

Skills & abilities

- SQL
- Python
- Pandas
- Databricks
- PySpark
- Snowflake
- ETL processes
- Delta Lake
- Redshift
- Data quality and validation
- Problem solving
- Leadership
- Mentorship skills
- Data quality assessment
- Proactive problem solving
- Effective communication
- Cross-functional collaboration
- Automation & Optimization
- Jira
- Cloud Platform

Experience

Cedar Gate Services Pvt. Ltd.| Principal Data Engineer, **2024-**

- Ingested and processed large dataset from diverse sources into centralized data warehouse (Redshift), ensuring clean, consistent, and accessible data for analytics and reporting.
- Collaborated with cross-functional teams to gather data requirements.
- Analyzed large datasets to support business intelligence initiatives.
- Maintained and optimized data infrastructure by developing custom SQL queries, user-defined functions, and stored procedures in Redshift to enable efficient data exploration.
- Defined and documented data deliverables, pipelines, and models to ensure alignment with business goals and analytics needs.
- Established data governance standards and quality benchmarks to ensure compliance with U.S. healthcare data regulations (e.g., HIPAA).
- Mentored junior engineers on best practices in data engineering.

Techkraft Inc. Pvt. Ltd. | Snr. Software (Data) Engineer | Lead **2022-2024**

- Implemented ETL processes to transform raw data into usable formats.
- Collaborated with teams to define data requirements and specifications.
- Designed a reusable PySpark-based data quality framework for structured and semi-structured data sources.
- Implemented automated anomaly detection scripts to proactively identify data issues.
- Conducted data quality assessments to ensure accuracy and completeness.
- Managed and mentored a team of 4 engineers to deliver projects on time while maintaining SLA adherence.

Cotiviti Nepal Pvt. Ltd. | Software (Data) Engineer **2018-2022**

- Built and maintained ETL workflows using ODI, Oracle SQL, and Python for US healthcare claims data.
- Optimized SQL queries to reduce report generation time by 35%, improving operational efficiency.
- Automated manual reconciliation processes, increasing throughput and accuracy of data delivery.
- Collaborated with business analysts to transform requirements into scalable data engineering solutions.

I.M.S. Investment Management Service Pvt. Ltd. | Software Engineer **2017-2018**

- Developed backend data integration logic in PHP (Laravel) and MySQL for investment tracking systems.
- Improved database query performance and implemented optimized data retrieval strategies.

Cotiviti Nepal Pvt. Ltd. | Trainee **2016-2017**

- Gained foundational knowledge in ETL workflows and Oracle SQL for healthcare data pipelines.
- Worked on basic data profiling and validation tasks to ensure data readiness for analytics.

Education

Bachelor's in computer engineering | T.U. **2016**

Kathford International College of Engineering and Management , Lalitpur

+2, Science | HSEB **2012**

Xavier Int'l College, Ktm

AWARD

- Best Employee Award 2023 - Techkraft Inc. Pvt. Ltd.
